

Dental Insurance

Eligibility

Reliant's Dental Insurance is available to any employee who works 30 hours or more. It is also available to your dependents, through the month of their 26th birthday. This dental offering allows quality care for dental needs, and Reliant recommends you utilize this benefit from the beginning of your employment. The employee has 30 days from a qualifying event to start this coverage.

To add a dependent child before their third birthday is considered a qualifying event. Your child is covered automatically whether you enroll or not for the first 18 months since babies don't usually have teeth, nor need coverage. After the first 18 months, you have until 31 days following the 3rd birthday of your child to enroll them in dental coverage. If you wait until after 31 days following the third birthday, you will be able to enroll them during the next Open Enrollment. See [Adding a Dependent to Insurance](#) for details and instructions.
