

DataSync with Toolbox (Tntconnect / MPDX)

Reliant provides a DataSync file that can be used with Tntconnect and MPDX. While we do not officially support these two platforms, instructions for how to import the file are below. This is not an automated process. [The DataSync file itself can be obtained from Toolbox](#), and must be re-downloaded and imported each time current data is needed.

- [Existing Tntconnect User Initial Datasync](#)
- [New Tntconnect User Initial DataSync](#)
- [Tntconnect Ongoing Datasync](#)
- [MPDX DataSync](#)
