

Reliant.org 1.12.2 Release Notes

Summary

We've continued to work hard to provide a great experience on Reliant.org for all devices and browsers, and have made some improvements to the missionary search page so it can be more usable on smaller screens in landscape mode. When users scroll down the page, the top bar is replaced by a smaller, floating menu which doesn't cover up the screen quite as much. We hope you appreciate the improvement!
